Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Contrast — These are opportunities to improve the legibility of your content.

▲ Background and foreground colors do not have a sufficient contrast ratio.

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Links do not have a discernible name

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn more in our guide on <u>conducting an accessibility review</u>.

Passed audits (13)

Not applicable (29)

Best Practices

Trust and Safety

Includes front-end JavaScript libraries with known security vulnerabilities — 9 vulnerabilities detected

Ensure CSP is effective against XSS attacks

Passed audits (16)

Not applicable (1)

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on Core Web Vitals. Learn more.

Additional items to manually check (1) — Run these additional validators on your site to check additional SEO best practices.

Passed audits (10)

Not applicable (4)

Progressive Web App

These checks validate the aspects of a Progressive Web App. <u>Learn more</u>.

▲ Web app manifest or service worker do not meet the installability requirements — 1 reason

PWA Optimized

Installable

▲ Does not register a service worker that controls page and start_url

Redirects HTTP traffic to HTTPS

▲ Is not configured for a custom splash screen Failures: No manifest was fetched.

Does not set a theme color for the address bar.

Failures: No manifest was fetched, No `<meta name="theme-color">` tag found.

Content is sized correctly for the viewport

Has a <meta name="viewport"> tag with width or initial-scale

▲ Does not provide a valid apple-touch-icon

▲ Manifest doesn't have a maskable icon No manifest was fetched

Additional items to manually check (3) — These checks are required by the baseline PWA <u>Checklist</u> but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
